

# Height Health Check

Falls from height are still the largest cause of accidents and injury at work. Whilst the overall level is constantly improving, these un-planned events still cost business's dearly in damage, disruption, and delay, in handling any resultant investigation, and most significantly in a decline in staff focus and morale. To this we must also add the suffering of the injured party and their family and friends .

All accidents are un-planned events and yet the vast majority are predictable, which makes them avoidable. With this in mind, Higher Safety are offering a Height Health Check. This involves a full review of :-

- Operations
- Facilities
- Existing access
- Existing process / procedure
- Maintenance / training

in the light of the Height Safety hierarchy, recent changes to best practice, and recent product developments. You will then receive a full report confirming existing facilities, and highlighting any areas of vulnerability.

General Contractor, Manufacturer, Building Owner, Occupier, Utility company, Transport company, or any other business .... You will have height safety issues. You are vulnerable to an un-planned fall from height, order your **Height Health Check** today ....
